

Highline Tutoring and Testing Center (HTTC)

WHO ARE WE?

Owner information:

Ms. Wendy, as she is referred to, is from a small farming town in Eastern Washington. She is a graduate of C.W.U. in the field of education. Ms. Wendy has had the opportunity to teach kindergarteners to life-long learners in the academic area of Language Arts, Writing, Math, and Reading. Her experience also includes working with special education and youth in need. She believes all students are capable of being successful in the academic field. You just have to have a way to reach them and their interests. She took a job as a professional tutor in her twenties and enjoyed it. Eventually, she opened up her own office with just a few students. The need started to grow and the office was moved twice to accommodate the students, tutors and families. Before Covid, she and a co-worker ran a senior writing course at local residential homes where family stories were being recorded by the residents. Ms. Wendy also helped to sponsor Distracted Driving workshops with some local police departments with hopes to do again after Covid. She was honored as Citizen of the Year in 2017 by the City of Burien.

History of HTTC:

Fall of 1983, Wendy opened up the family style tutoring center in the Central Business area of Burien, WA. Through the years, the location has changed but the idea behind the family style tutoring has stayed the same. Students still come first. Parents are welcome to ask for advice anytime and even stay to observe the tutoring session. The staff will communicate with school staff with family permission.

The fees were set in 1983 for the average family income. We still strive to keep reasonable rates and offer assistance to help families qualify for outside financial resources.

HTTC has a working history with the federal government funded tutoring programs, school districts, private agencies helping children at risk, state agencies and retraining programs. Colleges, states, and city governments have used our test proctoring services. In 2019, HTTC was honored by Clark, Inc. of New York City for their work with "Girls in Stem Programs".

Now in 2021, we are proud to say that our educational services now include accredited and regular classes through a private school. We work with credit retrieval, home schoolers, and self-challenging students who take classes to further their high school career. We still continue to provide one-on-one tutoring services to people from a worldwide basis while assisting their families as they navigate through the local school systems. We are members of Better Business Bureau and Discover Burien. HTTC proudly sponsors local high schools and the State Patrol. We have maintained Covid standards for schools since March 2020 when schools went to on-line learning. Masks are required.
